

Drug Death Prevention (Scotland) Bill

About You

Q1. Are you responding as:

An individual

Q2. Which of the following best describes you? (If you are a professional or academic, but not in a subject relevant to the consultation, please choose "Member of the public".)

Professional with experience in a relevant subject

Optional: You may wish to explain briefly what expertise or experience you have that is relevant to the subject-matter of the consultation:

I am employed in the health and social care industry and have experience in addictions settings.

Q3. Please select the category which best describes your organisation:

No Response

Q4. Please choose one of the following:

I am content for this response to be published and attributed to me or my organisation

Please provide your name or the name of your organisation. (Note: The name will not be published if you have asked for the response to be anonymous or "not for publication".)

Craig Burns

Q5. Please provide a way in which we can contact you if there are queries regarding your response. Email is preferred but you can also provide a postal address or phone number. (Note: We will not publish these contact details.)

XXXXXXXXXXXXXXXXXXXX

Q6. Data protection declaration

In order to proceed, please confirm that you have read and understood the Privacy Notice contained on Page 1

I confirm that I have read and understood the Privacy Notice to this consultation which explains how my personal data will be used.

Q7. If you are under 12 and making a submission, we will need to contact you to ask your parent or guardian to confirm to us that they are happy for you to send us your views.

No Response

Your Views On The Proposal

Q8. Which of the following best expresses your view of the proposed Bill? (please note this is a compulsory question)

Fully supportive

Please explain the reasons for your response.

The establishment of a new oversight body strictly dedicated to drug related deaths would allow appropriate allocation of funds and workforce without relying on cuts to other services.

Q9. Do you think legislation is required, or are there are other ways in which the Bill's aims could be achieved more effectively? Please explain the reasons for your response.

I believe legislation is the most effective route however would not be opposed to a private resource which worked under a regulatory body.

Q10. Which of the following best expresses your view of the proposal to establish overdose prevention centres?

Fully supportive

Please explain the reasons for your response.

Naloxone is not currently as accessible as it should be nor is it common knowledge to the public. Giving drug users a judgement free area with specialised staff takes the burden from the public and will also raise awareness.

Q11. Which of the following best expresses your view of the proposal for a licensing regime to enable the establishment of overdose prevention centres?

Fully supportive

Please provide reasons for your response, including on the proposed conditions for licensing (see pages 12 to 14 of the consultation document) and on the proposal that health and social care partnerships are responsible for licensing and scrutinising OPCs?

Like any other health and social care facility, the rights of patients and practices of employees must be closely examined and protected so as to reach the optimal level outcome with this service.

Q12. Which of the following best expresses your view of the proposal for a new body, the Scottish Drugs Deaths Council?

Partially supportive

Please provide reasons for your response, including views on the proposed functions of the SDDC (see pages 14 to 16 of the consultation document) and on how it should operate in practice.

The statistics for Scottish drug deaths alone speak to the need of an oversight committee for this specific issue. I believe it would need to be operated by a multi-disciplinary team including rehabilitative or drug-safety service options following a patient's presentation to a service.

Financial Implications

Q13. Any new law can have a financial impact which would affect individuals, businesses, the public sector, or others. What financial impact do you think this proposal could have if it became law?

some increase in costs

Please explain the reasons for your answer, including who you would expect to feel the financial impact of the proposal, and if there are any ways you think the proposal could be delivered more cost-effectively.

I feel more funds are desperately needed in general for health and social care, not just for this issue. However the implementation of this legislation and the oversight group would require a cash injection to ensure a steady foundation for the support to grow from.

Equalities

Q14. Any new law can have an impact on different individuals in society, for example as a result of their age, disability, gender re-assignment, marriage and civil partnership status, pregnancy and maternity, race, religion or belief, sex or sexual orientation.

What impact could this proposal have on particular people if it became law? If you do not have a view skip to next question.

Please explain the reasons for your answer and if there are any ways you think the proposal could avoid negative impacts on particular people.

No Response

Sustainability

Q15. Any new law can impact on work to protect and enhance the environment, achieve a sustainable economy, and create a strong, healthy, and just society for future generations.

Do you think the proposal could impact in any of these areas? If you do not have a view then skip to next question.

Please explain the reasons for your answer, including what you think the impact of the proposal could be, and if there are any ways you think the proposal could avoid negative impacts?

I believe this law would have a positive effect on the economy - creating lots of new job opportunities both in facilities and in the community, as well as potentially guiding service users to employment through safe drug use or sobriety.
