

Drug Death Prevention (Scotland) Bill

About You

Q1. Are you responding as:

An individual

Q2. Which of the following best describes you? (If you are a professional or academic, but not in a subject relevant to the consultation, please choose "Member of the public".)

Member of the public

Optional: You may wish to explain briefly what expertise or experience you have that is relevant to the subject-matter of the consultation:

Member of the family has addiction

Q3. Please select the category which best describes your organisation:

No Response

Q4. Please choose one of the following:

I am content for this response to be published and attributed to me or my organisation

Please provide your name or the name of your organisation. (Note: The name will not be published if you have asked for the response to be anonymous or "not for publication".)

F J Dougall

Q5. Please provide a way in which we can contact you if there are queries regarding your response. Email is preferred but you can also provide a postal address or phone number. (Note: We will not publish these contact details.)

[REDACTED]

Q6. Data protection declaration

In order to proceed, please confirm that you have read and understood the Privacy Notice contained on Page 1

I confirm that I have read and understood the Privacy Notice to this consultation which explains how my personal data will be used.

Q7. If you are under 12 and making a submission, we will need to contact you to ask your parent or guardian to confirm to us that they are happy for you to send us your views.

No Response

Your Views On The Proposal

Q8. Which of the following best expresses your view of the proposed Bill? (please note this is a compulsory question)

Partially supportive

Please explain the reasons for your response.

There is no magic bullet here.

The service provided all over Scotland is woeful.

There is an absence of planning for patients in individual agencies let alone inter-agency planning.

There is absence of cooperation between agencies that is terrifying.

Given that the majority of patients have two or more illnesses, close cooperation between agencies dealing with different but connected issues needs to improve significantly. Senior members of the executives of the various agencies need to engage with each other and their workforces to ensure this occurs.

The existing guidelines that the various agencies are meant to work to need to be enforced. What agencies are meant to do and what they do are startlingly different. See NICE guide lines and MAT standards.

Q9. Do you think legislation is required, or are there are other ways in which the Bill's aims could be achieved more effectively? Please explain the reasons for your response.

Existing guidelines and standards need to be adopted and enforced.

Is legislation going to be able to address the lack of cooperation between agencies? Ie Health and local authorities. What part will the third sector take in this?

The problems in the various agencies need to be identified and addressed. Will legislation help?

What is going to be done about the mental health of the patients?

Q10. Which of the following best expresses your view of the proposal to establish overdose prevention centres?

Partially supportive

Please explain the reasons for your response.

If this prevents deaths then that is a good thing. What is going to be done afterwards?

How does Scotland reduce the number of addicts/patients?

Early intervention needs to start being effective.

Q11. Which of the following best expresses your view of the proposal for a licensing regime to enable the establishment of overdose prevention centres?

Partially supportive

Please provide reasons for your response, including on the proposed conditions for licensing (see pages 12 to 14 of the consultation document) and on the proposal that health and social care partnerships are responsible for licensing and scrutinising OPCs?

Good luck with trying to get local communities on board.

Q12. Which of the following best expresses your view of the proposal for a new body, the Scottish Drugs Deaths Council?

Partially supportive

Please provide reasons for your response, including views on the proposed functions of the SDDC (see pages 14 to 16 of the consultation document) and on how it should operate in practice.

Alcohol should be added. Alcohol deaths in Scotland is also a national scandal.

Financial Implications

Q13. Any new law can have a financial impact which would affect individuals, businesses, the public sector, or others. What financial impact do you think this proposal could have if it became law?

some increase in costs

Please explain the reasons for your answer, including who you would expect to feel the financial impact of the proposal, and if there are any ways you think the proposal could be delivered more cost-effectively.

The shortcomings of the addiction services including NHS needs to be addressed.

Equalities

Q14. Any new law can have an impact on different individuals in society, for example as a result of their age, disability, gender re-assignment, marriage and civil partnership status, pregnancy and maternity, race, religion or belief, sex or sexual orientation.

What impact could this proposal have on particular people if it became law? If you do not have a view skip to next question.

Please explain the reasons for your answer and if there are any ways you think the proposal could avoid negative impacts on particular people.

Lowering deaths is a good thing. Not addressing the fundamentals that have lead to this situation is not.

Sustainability

Q15. Any new law can impact on work to protect and enhance the environment, achieve a sustainable economy, and create a strong, healthy, and just society for future generations.

Do you think the proposal could impact in any of these areas? If you do not have a view then skip to next question.

Please explain the reasons for your answer, including what you think the impact of the proposal could be, and if there are any ways you think the proposal could avoid negative impacts?

Improving mental health would be a good thing. Saving someone's life while not addressing why their life is in danger might not help. How is that to be addressed?
